

# External Concrete Repairs & Decoration

**Park Crescent London W1**

**June 2021**

**Project Value £175K**

Park Crescent is part of the International Students House Charity that enables young people worldwide to achieve their academic aims and to provide accommodation whilst they study.

Every Project Counts were contracted to carry out repairs to the exterior of the prestigious building and then decorate prior to a Royal Visit.

The central London location made for careful planning and programming to enable movement of traffic and general public safety.

The building was part of the Crown Estates and thus had to comply with stringent methods of repair and careful choice of colours for the decoration works.

Our team completed the project in time for the Royal visit and have since carried many other projects for the Charity.
