

## Wing Refurbishment

South London & Maudsley MHT

June 2019

Project Value £900K

This project involved fitting out a satellite building to Lambeth Hospital. Every Project Counts was contracted under a design and build scheme and provided new Q-Mark third party certified door sets and anti ligature kitchens, bathrooms and bedrooms and new vinyl flooring. One of the problems we found was finding an adequate material that would be robust enough to meet the trusts standards within a secure area. We introduced them to a resin bound finish on the walls, floor and ceiling, as the traditional method had been proved to be insufficient. The project was completed to an extremely high standard and was praised by the trust for the quality and professionalism of all involved.
