

everyproject counts Case Study

External Concrete Repairs & Decoration

Client: Park Crescent London W1

Value: £175K

Park Crescent forms part of the International Students House Charity, an organisation dedicated to supporting young people from across the globe by providing accommodation and helping them achieve their academic goals.

Every Project Counts was appointed to carry out essential external repairs and redecoration works to this prestigious building, with the project requiring completion ahead of a Royal Visit.

The central London location presented logistical challenges, demanding careful planning and programming to ensure the safe movement of traffic and protection of the general public throughout the works. As part of the Crown Estate, the building also required strict adherence to approved repair methods and meticulous selection of colours for the external decoration, ensuring compliance with heritage standards.

Thanks to the professionalism and attention to detail of our team, the works were completed to the highest standard and delivered on time for the Royal Visit.
