New Unisex Staff Toilets

Client: Portway Primary School

Value: £25K

This complex project started with the safe removal of asbestos ceiling tiles and the demolition of the wall dividing the men's and women's toilets. To support the structure above, steel beams were installed before levelling the entire floor and finishing it with a new tiled surface.

Because of the sensitive nature of creating unisex toilets, we designed and installed full-height cubicles and partitions, along with soundproofing, to ensure privacy and comfort. To meet current regulations, a fully accessible disabled/ambulant toilet was also added. Working closely with the head teacher, our design team helped shape the final layout, fixtures, and fittings. The result is a modern, practical, and inclusive facility delivered to a high standard and is a real improvement for staff, pupils, and visitors alike.
