

everyproject counts Case Study

Staffroom and Toilet Extension

Client: Salisbury Primary School

Value: £490K

Every Project Counts was contracted to undertake the extensive demolition of the existing staffroom and toilet facilities in order to create a modern, welcoming new staff area. Working in close collaboration with the client, we successfully delivered a space that not only met the school's functional requirements but also aligned with the design brief, resulting in an environment that is both practical and aesthetically appealing.

The transformed staff area now features a contemporary kitchen with Karndean flooring, a bespoke quartz worktop, integrated appliances, a hot and chilled tap, and a striking colourful sprayed-glass splashback. These carefully chosen finishes combine durability with modern design, creating a vibrant and enjoyable space for staff to use. In addition, the project included the installation of new unisex staff and children's toilets. To ensure compliance with regulations, full-height SGL cubicles were installed, providing both privacy and durability.
