

Sensory Garden

Edgware Hospital

June 2021

Project Value £20K

Every Project Counts was intrusted to carry out a sensory garden project for Barnet Enfield & Haringey Mental health NHS Trust (BE&H). We were allocated 6 weeks to complete the project, it was in fact completed in 5 weeks and within budget. The original garden had become overgrown and unusable for the service and had to be completely demolished. The infrastructure was completely renewed involving new drainage, electrical supply lighting and water supply. The finishes included resin stone pathways, a water feature, tree & plants planting, turfing and decoration to walls. To complete the work our team of operatives worked weekends and extended their working days. All the service staff were thrilled with the end result.
